

ANNEX D: RANGE TERMS

Range Complex – This term refers to the TMC in its entirety. It includes the Rifle Range, Pistol Range, Airgun Range, lobby, team break rooms, hallways and locker rooms.

Firing Range – The term firing range refers to the specific enclosure in which firing takes place. It includes the entire area inside the range entrance doors to the back stop. There are three firing ranges on TMC – The Smallbore Rifle Range, the Air Gun range and the Pistol Range.

Firing Line – The firing line is the line running parallel to the target line at which all firing takes place. No one is permitted forward of this line without the consent of the Facilities Manager .

Forward Area – The area forward of the firing line to the impact area.

Impact Area – The area at and within three feet of the metal plating on which projectiles impact. This includes the granulated rubber and rubber sheeting covering the metal plating.

Backstop – The metal plating on which projectiles impact. The Rifle and Pistol ranges have access rooms to the rear of the metal plating. These will be known as the Backstop access areas.

Common areas and hallways – The lobby near the main entrance and hallways are common areas used by all teams, range users and employees. All shall take care to maintain these areas in appropriate, professional appearance and serviceable state.

Break Rooms – There is a Rifle Team break room and a Pistol Team break room. Each team is responsible for the physical security and daily cleaning and upkeep for their respective room.

Rest Room/Latrine areas – There is a women’s restroom and two men’s rest room located on TMC.

Locker Rooms – There are two lockers rooms in TMC fitted with changing rooms and showers located along the hallway of the East side of the building. They are available for changing or showering before and after firing.

Filling Station – The system composed of the air compressor, storage tank, regulator and filling ports used to fill compressed air cylinders and air rifles and pistols. The filling station is located in the arms room vestibule. Only trained and authorized personnel may use the filling station.

Arms Room – The secured area near the entrance of the range where weapons, approved ammunition and sensitive items are stored.
